DAVID O. EZEANI

Full-Stack Software Developer

Yaba, Lagos State, 101017, Nigeria

Email: davidezeani11@gmail.com
Phone: +2348140301436

EDUCATION

University of Lagos, Akoka — Lagos, Nigeria
Bachelor of Science, Computer Sciences — November 2025

SKILLS

Programming Languages:	Python, JavaScript/ES6+, Java, C
Frontend Frameworks:	HTML5, CSS and jQuery, React.js, Next.js, Redux, TypeScript, MUI, Tailwind.
Backend Frameworks:	Django, Flask, FastAPI, Node.js, Next JS Route Handlers, PHP, Spring Boot.
SQL and Database:	MongoDB, PostgreSQL, MySQL, SQLite ***Cloud:*** GCP
Dev Tools and Abilities:	Testing and Debugging, Version Control with Git, Containerization with Docker Problem Solving, Algorithms and Complexity/ Data Structure
Other Skills:	Excellent Communication, Stakeholder Management, Team Leading, Academic Writing, Graphic design.

PROJECTS

Admoni Marketing Admin Suite (Frontend) | LINK — February 2026

- Integrated real-time reporting and visualization tools (charts, KPIs, performance metrics) to help marketing teams track ROI and optimize campaigns, reducing manual effort by 30%.
- Automated repetitive workflows such as lead tracking, approvals, and notifications, reducing manual effort and improving operational efficiency by 20%.
- Delivered a polished, user-friendly interface that reduced training time for non-technical staff.
- Collaborated with designers, product managers and other stakeholders to translate business requirements into technical features, ensuring the suite directly supported marketing goals.

Nurture Path Surrogacy Services Enterprise WebApp (Full Stack) | LINK — June 2026

- Architected and developed a scalable surrogacy management platform from scratch using the MERN stack, streamlining the end-to-end application process for surrogate mothers and intended parents.
- Digitalized the company's client documentation processes, projected to enhance business operational efficiency by a 100%.
- Designed and implemented robust MongoDB schemas to manage complex data relationships between client profiles, administrative logs, client applications, and financial transactions.
- Built in payment system to enable online payment with bank card using Paystack.
- Built a comprehensive administrative dashboard featuring secure authentication and intuitive navigation to centralize platform management and oversight.
- Developed secure RESTful API endpoints for user authentication, application initialization, and real-time financial transaction processing.
- Engineered a custom document signing workflow, integrating a signature canvas and automated PDF generation to digitize legal documentation and improve onboarding speed.
- Optimized platform infrastructure by designing scalable backend services to handle concurrent user applications and sensitive document storage.

WORK EXPERIENCE

Nurture Path Surrogacy Services (Lead Software Developer – Part time Contract) **April 2026 – August 2026**

Full Stack Developer/ Technical and Business Logic Software Manager

- Managed a team of Software Developers and built a full stack end-to-end enterprise WebApp from scratch.
- Designed and directed the engineering of Next js API route handlers, for server-side functionalities.
- Designed database schemas and Data Relationships. Managed indexing, aggregation and connection pooling with MongoDB, improving data retention, processing and digital documentation.
- Digitalized all company processes turning concepts, business procedures and logic into actionable steps, operation modules and pages for the Enterprise WebApp for both the clients and admin. This is projected to boost efficiency by a 100%.

Admoni Investments (Full Stack Developer) **September 2025 – October 2026**

Web Developer/ UI designer

- Engineered companies new product AFRICON admin suite integrating API endpoints.
- Reorganized the AFRICON UI, making page more intuitive.
- Engineered the Admin Suite for company's main product Admoni App, integrating real-time reporting and visualization tools, automating repetitive workflows and enhancing UI increasing efficiency by 20%.
- Integrated API endpoints for all features on the admin suite.

Unilag Microfinance Bank (Software Developer Intern) **April 2024 – October 2024**

Software Developer/ Technical Support Intern (banking)

- Digitalized and streamlined various bank processes, which include; bank's account opening form for new user, applications landing page, public sector loan application form and QR Merchant onboarding form. This enhanced their processing time by average of 35%.
- Assisted compliance officer, writing scripts for calculation of bank finances and auditing, enhancing automation of processes, which increased efficiency and productivity by 10%.
- Assisted customer service in resolving issues related to user account and app installation/onboarding, increasing customer satisfaction by 10%.

CERTIFICATIONS

Django Web Framework (Meta) | CERTIFICATE

Mastered fundamentals of building Enterprise Web Applications, gaining understating of Backend architecture like the MVT, Data modelling with ORM, Middle ware engineering, Mapping of Views/App functions to routes.

React Basics (Meta) | CERTIFICATE

Gained understanding of advanced Modern Responsive Webpage Building, component-based Frontend Web design, advanced state management practices and JavaScript DOM manipulation.

Essential Google Cloud Infrastructure: Foundation (Google) | CERTIFICATE

Mastered the use of Google Cloud Console, Cloud Shell & SDK, Virtual Networking (VPC). Gained understanding on managing Project, Networks & Subnets, IP Addressing, Routes and Firewall Rules, Virtual Machines and VM instances. Learned the various compute services offered by google with focus on Compute Engine (IAAS).
